PROFESSIONAL SUMMARY

Android Developer with 3.5 years of experience building native mobile applications using Kotlin and Java. Hands-on expertise in MVVM architecture, Coroutines, Jetpack Compose, BLE communication, GPS integration, REST APIs, SQLite Room Database and Firebase. Proven track record delivering production-ready Android apps for IoT, automotive, and sports domains. Focused on writing clean, maintainable, and scalable code for reliable mobile experiences.

TECHNICAL SKILLS

Languages: Kotlin, Java, SQL, Dart

Android: Android SDK, Android Studio IDE, MVVM, Coroutines, Jetpack Compose, Services, JUnit, Hilt, Mockito, Navigation Component (NavGraph), BLE, Wi-Fi Manager API, OTA Updates, GPS & Maps Integration, Google ML Kit, QR Scanning (ZXing)

Architecture & Patterns: MVVM, MVP, OOP, Repository Pattern, Clean Architecture principles

Networking & Backend: RESTful APIs, Firebase (Firestore, Realtime DB), SQLite, PostgreSQL, MySQL

Tools: Android Studio, Git, Google Play Console, Google Play Store Publishing

Additional Exposure: Flutter, .NET MAUI, Xamarin, Python Django

EXPERIENCE

Senior Software Engineer

InThings Technologies

Jan 2023 – May 2026

Karinkallathani, Kerala

ADASOne & DrSafe — Android (Kotlin & Java)

- Engineered end-to-end BLE communication layer covering device scanning, OTA firmware delivery, and Esp camera and hub configuration using Kotlin Coroutines and Android Services, ensuring zero UI blocking during all background operations.
- Architected MVVM-based dual-application Android suite with synchronized video playback, real-time speed/RPM graphing, and GPS tracking – evolving ADASOne into the full-featured DrSafe production product.
- Implemented NavGraph-based navigation and modular architecture to support long-term maintainability and feature extensibility across both apps.
- Implemented Jetpack Compose-based UI components to modernize screens and improve maintainability.

Technologies: Kotlin, Java, MVVM, BLE, Coroutines, Jetpack Compose, Services, Navigation Component, REST API, GPS

Onesense Configuration — Native Android (Kotlin)

- Re-developed a dedicated native Android Kotlin application replacing an initial cross-platform build, per client requirement for a more optimized and platform-native mobile experience.
- Delivered BLE and Wi-Fi based IoT device configuration, QR-based device verification (ZXing), ML-Kit, OTA firmware update flows, and cloud-to-physical device mapping via local REST APIs.

Technologies: Kotlin, BLE, Wi-Fi Manager API, REST API, ZXing QR, OTA, ML-Kit

Shooting Sports Tracker — Android (Kotlin)

- Designed multi-role (Guest/Coach/Student) competition management system with interactive shot-marking, real-time scoring, performance analytics, and climate condition inputs.
- Implemented Computer Vision and Google ML Kit pipeline to auto-detect shot positions and extract scores from images, significantly reducing manual data entry effort.
- Built a performance analytics feature that analyzed competitor-level results, monitored improvement trends, and presented insights through graphs and comparative metrics.
- Added unit tests for core logic where applicable.

Technologies: Kotlin, Jetpack Compose, Xml, Firebase, Google ML Kit, Computer Vision

Athleon — Sports Management Platform

- Delivered the first-ever digital competition management system for Indian national deaf sports, deployed live at the 2025 National Deaf Shooting Championship (AISCD, Ahmedabad).
- Received official Letter of Appreciation from the All India Sports Council of the Deaf, a Ministry of Youth Affairs & Sports, Government of India recognized body.

Technologies: Firebase, Real-time Data Sync

Full Stack Development Intern

Jun 2022 – Dec 2022

Zoople Technologies

Ernakulam, Kerala

- Developed RESTful APIs and backend logic using Python Django, focusing on scalable and maintainable code structure.
- Worked with PostgreSQL databases for data management, query optimization, and performance improvements.
- Gained practical full-stack experience across backend and frontend, strengthening ability to collaborate with API-driven Android applications.

EDUCATION

Calicut University

Calicut, Kerala

Bachelor of Computer Applications

2019 – 2022
